## Landowner Objectives:

- defensible space and reduce wildfire hazard
- to thin \_\_\_\_ acres of forested land to improve overall forest health and control disease and insects
- to remove excess, poor quality, dead and dying trees
- to improve wildlife habitat
- other: \_\_\_\_\_

Forest type:  Pinon-Juniper     Ponderosa     Mixed Conifer

Transfer station fees will be paid by homeowner for slash disposal if needed.

**Landowner must clearly identify boundary lines** and must be present during treatment tasks.

By signing below you are giving consent for Wildfire Network and its contractors and/or employees to access your property and complete treatment tasks. Landowner understands and agrees to treatment task recommendations and WILL NOT hold Wildfire Network, nor its contractors and employees liable for treatment implementation and/or the results of treatment implementation.

***Treatments DO NOT guarantee your home and property's survival during a wildfire.***
